

## ***TWINSON OBTAINS PEFC CERTIFICATION!***

We are proud to inform you that Twinson has received the **PEFC certification!**

PEFC is a system of forest-certification that certifies that wood comes from a **durable origin**: No more logging than what the forest produces, replanting of trees, respecting the habitat of plants and animals, protection of bio-diversity, etc.

**The PEFC certification underlines Deceuninck's environmental commitment.**

We have made a press release and a guiding presentation to support you to launch this certificate in your country.

You can download it on Communication Network, together with the official logo and how to use the logo (Sharepoint).

Gradually we will further implement it in all Twinson related marketing materials.
